## ***“No Sodium Added” Abrasives***

W Abrasives cast steel shot, angular-shot and grit is manufactured with **no addition of cosmetic chemical coatings of any kind. No soluble salts, in the form of nitrates or chlorides are being introduced into the manufacturing process. In fact, W Abrasives’s unique heat treatment methods of air quenching eliminate the potential of exposure to non-visible, soluble contaminants, which may be present in alternate water- quench practices.**

Air quenching as applied by W Abrasives provides contaminant-free surfaces and superior particle integrity with minimal stress crack presence.
