

Want to boost your peening and blasting performance ?

SP SHOT

cast steel shot according to AMS (Aerospace Material Specification) :

- Higher fatigue life (Shot Peening)
- Better components shape (Peen Forming)

Stelux C (chromium) & Stelux CN (chromium-nickel)

stainless steel shot for non-ferrous materials :

- Higher corrosion resistance
- Better surface brightness
- Lower blasting cost

UFS (Ultra Fine Shot)

Ultra fine cast steel shots from 50 to 150 μm for fine Peening or second Peening :

- Higher stress level at top surface
- Lower roughness
- Able to treat even very small parts and complex geometries

CUT WIRE

High quality Cut Wire Shot to boost the performances of your parts in a cost-efficient and sustainable way :

- Manufactured according to main standards (AMS, SAE, VDFI)
- Available in wide range of size, hardness and metallurgy
- Quality control on each manufacturing batch with certificates available upon despatch
