

SERVICES

One-stop solution for blasting operations

CONSULTING

We team up with our clients to offer customized advice to improve your blasting parameters. We audit your blasting process and equipment to propose improvements and action plans.

TESTING

Whether it's for a new process, to improve productivity or solve a problem, our technical center is available to you to solve your challenge by testing your own products, with various solutions, without disrupting your production line.

TRAINING

Either through our internal or on-site training, increasing your team's knowledge on blasting processes and operations will increase the efficiency and consistency.

REPAIRS & MAINTENANCE

Maintain, upgrade or repair your blast equipment to improve your productivity. Service includes part replacement, service contracts and machine overhaul.

OPTIMIZATION

Optimize and Modernize your equipment with the latest technology to reduce your operating costs.

In house & on-site trials
